
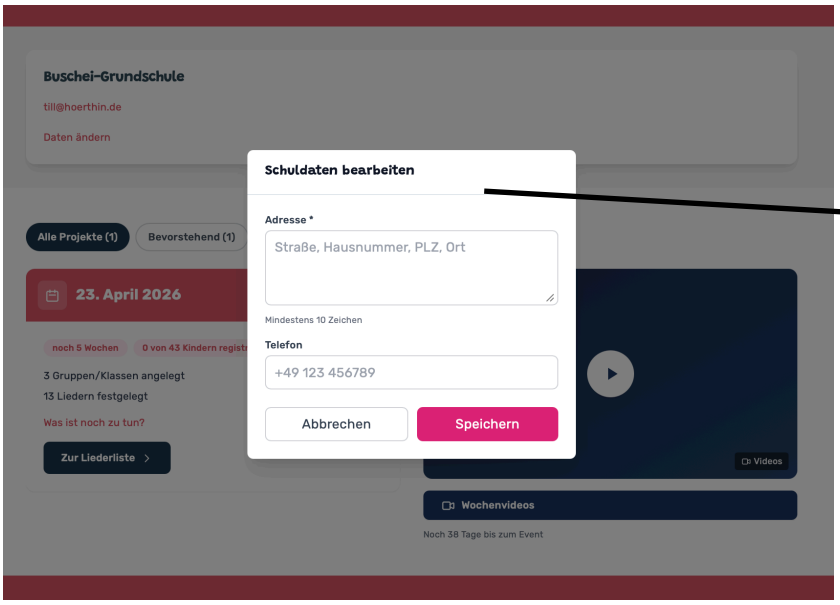
Schooldata like adress, plz, city, phone should appear here

Does not match the correct amount of classes. See further note on page 3

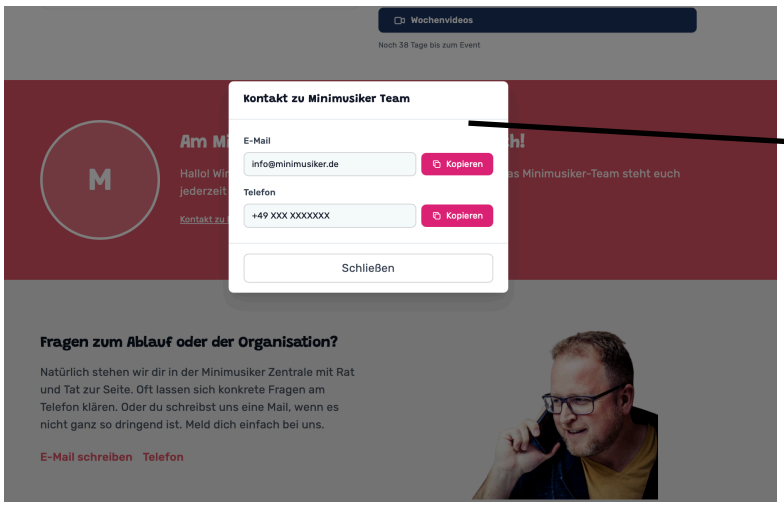
Delete this, as long as it has no function!! !

Call this „Aufnahmetag verwalten“

Why did nobody appear here, although there is a staff assigned !



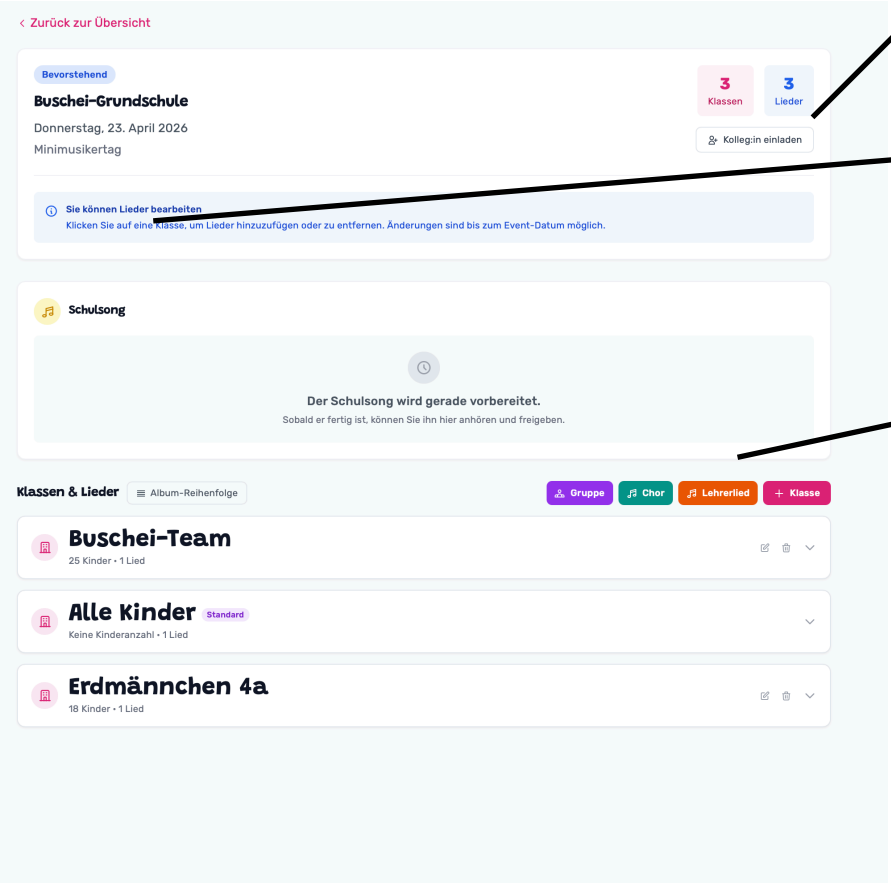
When I click „Daten ändern“ it must not be blank, but prefilled with the schooldata from the data record



Please never ever provide infos like this! If it needs a fallback, then use our phone number from the office, but not the xxxx

!

Again, wondering why the staff member does not appear here

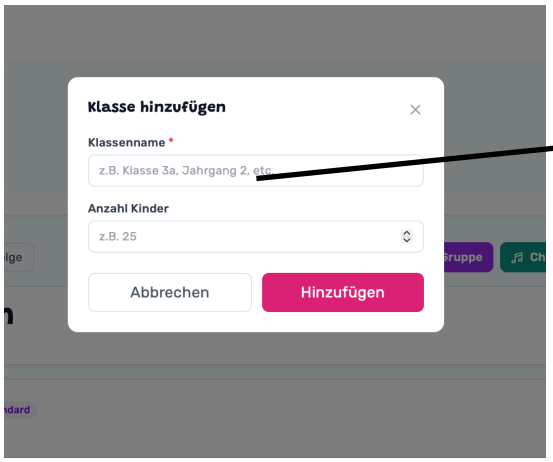


Has to be way bigger!

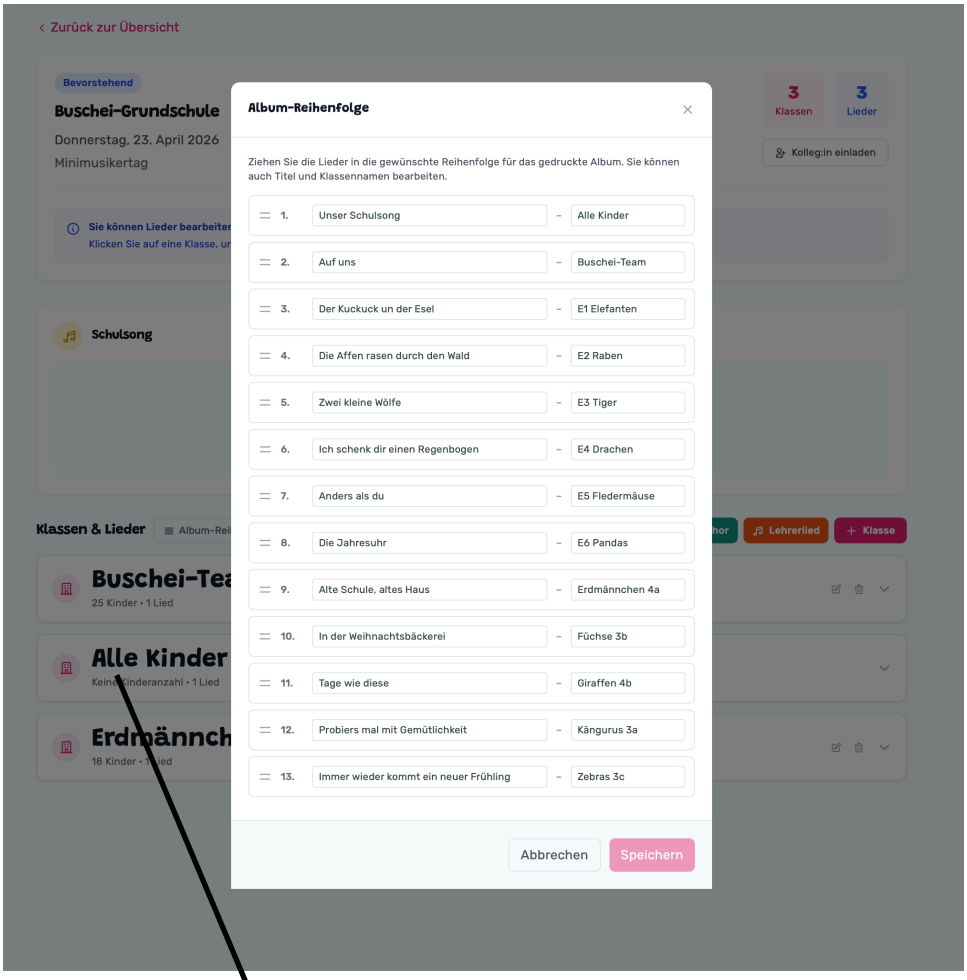
Do not use „Sie/Ihre“ but „Du/Eure“

Looks like a filter, not a button to add something. Please use „Gruppe erstellen“, „Chor erstellen“, „Lehrerlied erstellen“ and „Klasse erstellen“

!



The help text is misunderstanding, because „Jahrgang 2“ is a group and not a class. Say “Fuchsklasse“



I can see only three classes and three songs, but when I click on the button „Track order“ I see them all…

!
